CALIFORNIA NEEDS A VISION AND PLAN FOR ITS DIVERSE AGING POPULATION

More than **80 percent** of California voters would **support a gubernatorial candidate** who has a vision and long-term investment plan for the state's older adults

Californians age 65+ will increase to **more than 9 million** by 2030—that's 20 times the growth rate of those younger than 65!

Californians age 85+ will increase to **1.2 million** by 2030, a 56 percent increase

Given these trends, leaders must create a vision and actionable plan to prioritize state resources so that older Californians truly live with dignity and independence
